PERSONAL PROJECTS

Contact Application in Python (2022)

- Simple Contact App developed using basic python and file handling concepts.

Snake Game in Python (12/2022)

- Snake Game is an engaging game developed in Python utilizing Pygame, time, and random libraries.

BackPack (05/2023)

- Backpack is a Java-based Android app designed to prevent forgotten items during trips, offering comprehensive checklists.
- Users can categorize items for clothing, health care items, electronics, and more, streamlining travel preparation. Customization options allow users to include specific items, ensuring nothing vital is left behind.
- Backpack provides peace of mind, reducing the stress of forgotten essentials on journeys.

CoupSwap (07/2023 - 08/2023)

- CoupSwap is a Coupon Sharing Application that allows users to share their claimed rewards from popular platforms like PhonePe, GPay, and more. It is developed using the Django Framework, HTML, CSS, and Bootstrap 4.
- This application performs four main functions: creating, deleting, and updating user accounts, adding, deleting, and updating coupons, facilitating coupon access requests and approvals between users, and searching for coupons based on categories and filters.
